

# ***The Beneficial Budgetary***

It is our belief, at Pavement Maintenance Specialties, that there are great benefits to getting budgetary proposals for next season's project, right now...in the Fall!

## **KNOW ALL OF YOUR OPTIONS & HAVE A PLAN IN PLACE!**

Our team will assess your parking lot this fall and present you with all of the options available to address your pavement needs.

With detailed specifications, identifying square footages and material amounts, you will have Good, Better and Best analysis report right at your finger tips. We can also provide satellite imaging with your proposal which will clearly identify the areas we believe to be the most necessary to address.

## **PREFERRED & EARLY SCHEDULING WHEN YOU DECIDE EARLY!**

When you have your proposal earlier than most, it allows you the opportunity to make a decision before the season starts. This will give you a leg up on early & priority scheduling. Often times, the jobs that are approved in the Fall are installed in the Spring or early Summer....allowing you to enjoy your pavement a little longer and not have the pressures of unpredictable weather patterns of late season installation.

## **LOCK IN NEXT YEAR'S PROJECT AT THIS YEAR'S PRICING**

One of the most beneficial advantages to getting a budgetary proposal this Fall is that you can lock in next year's project at this year's pricing. Pavement Maintenance Specialties can lock in your price when your project is authorized by December 15th. This is because we can put in a Purchase Order with Concrete/Asphalt Plants for next year and they will hold the pricing. This means that when the material prices increase - you will not realize any of that price hike!
